ABSTRACTED-PUB-NO: ZA 9803353A

BASIC-ABSTRACT:

**NOVELTY - The recording system creates a customized recording
at a remote
station by uniquely selecting several music or video tracks
stored on compact
discs, (CDs), for example. The tracks are retrieved from the CDs**

**and recorded
on another CD. The financial and or database records are then
updated in
response to the unique track selection.**

**USE - For making a selection of music or video tracks from
compact discs to
record them on other discs.**

**ADVANTAGE - User may also record personalized audio or video
inserts via audio
and video input circuitry and a microphone and a video camera
onto the
recording medium.**
